10000 Cranes Studio is a professional printing facility geared to producing masterful prints from original digital files or original works of art. We use only high-quality, archival fine art papers and canvas with HDR Ultrachrome® pigment inks. These materials have a wide color gamut and high Dmax (density) value ensuring correct color and tonal range. Our paper and ink combinations have been rated with Wilhelm Imaging® to withstand color fading and deterioration for 200+ years.

Our professional equipment is calibrated to assure consistent results. We've been working with artists and photographers in the Albuquerque and surrounding area for the last eight years. We are professional artists and understand the values that artists have. We invite you to visit our studio, talk to us about your project and experience expert results.

Discount Pricing is available for large orders. Call for details.
